Technical Information Guide

Overview

It has been noticed that during previous videoconferences that some sites will try to receive a broadcast without having a technical person present who understands how to tune in the receiver. These sites often miss the videoconference and experience a high level of frustration.

EDJJ will only assume responsibility for program transmission. Each receiving site will be responsible for its own reception of the program. Please review page 3 for all relevant information.

Reception Issues

This broadcast will be aired on both C band and KU band
